Computer Methods in Applied Mechanics and Engineering 96 (1992) 439–440
North-Holland

Cumulative contents

Volume 96, No. 1, April 1992

The effect of different scalings in the modelling of nonlinearly elastic plates with rapidly varying thickness
L.J. Alvarez-Vazquez and P. Quintela-Estevez 1

A parallel iterative algorithm for structural optimization
W. Xicheng and M. Guixu 25

Fundamental solutions to Laplace's potential operator and to Navier's elasticity operator for Riemann surfaces with finite and infinite numbers of sheets
U. Heise 33

A boundary-perturbation finite element method for plane elasticity problems
D. Givoli, I. Elishakoff and Y. Stavsky 45

The influence of numerical parameters in the calculation of gas turbine combustor flows
J.J. McGuirk and J.M.L.M. Palma 65

Advances in one-point quadrature shell elements
T. Belytschko, B.L. Wong and H.-Y. Chiang 93

A quasi-frontal subspace iteration method for finite element dynamic analysis and its application
G. Liu, D.-W. He and Y.-W. Shen 109

A relationship between stabilized finite element methods and the Galerkin method with bubble functions
F. Brezzi, M.-O. Bristeau, L.P. Franca, M. Mallet and G. Rogé 117

Instructions to authors 131

Volume 96, No. 2, April 1992

On a stress resultant geometrically exact shell model. Part V. Nonlinear plasticity: formulation and integration algorithms
J.C. Simo and J.G. Kennedy 133

On the control of partial differential equations: A C^K discretization method
M. Rouff 173

The (symmetric) Hessian for geometrically nonlinear models in solid mechanics: Intrinsic definition and geometric interpretation
J.C. Simo 189

The relationship between the generalised mid-point and trapezoidal rules in incremental elasto-plasticity
L.J. Rencontre, S. Caddemi and J.B. Martin 201

Generalized variable finite element modeling and extremum theorems in stepwise holonomic elastoplasticity with internal variables
C. Comi, G. Maier and U. Perego 213

The characteristic streamline diffusion method for convection-diffusion problems
P. Hansbo 239

The method of fundamental solutions for transmission and scattering of elastic waves
P.S. Kondapalli, D.J. Shippy and G. Fairweather 255

A weakly singular form of the hypersingular boundary integral equation applied to 3-D acoustic wave problems
Y.J. Liu and F.J. Rizzo 271

Announcement 289

Instructions to authors 291

Volume 96, No. 3, May 1992

Temperature rise in elastic-plastic metal
A. Służalec 293

Vectorization techniques for explicit arbitrary Lagrangian–Eulerian calculations
D.J. Benson 303

A geometrically nonlinear model of the adhesive joint problem and its numerical treatment
U. Edlund and A. Klarbring 329

Computer simulation of vortex flows around a body of revolution at high angles of attack and low speed
W. Zhang, S. Luo and P. Zhu 351

Solitary waves interaction for the BBM equation
L. Iskandar and M.Sh.E.-D. Mohamedein 361

Dynamics of flexible beams for multibody systems: A computational procedure
J.D. Downer, K.C. Park and J.C. Chiou 373

Discontinuity-capturing operators for elastodynamics
G.M. Hulbert 409

Author index 427

Subject index 431

Instructions to authors 437
